## Experience

### CauseForce

2019- 2020

#### Role: Web Developer

- Built websites and developed web content to client specifications on Luminate Online and Rallybound. Developed documentation and testing methodology to ensure cross-browser compatibility and responsiveness.
- Leveraged third party and platform APIs to develop web applications with interactive and personalized content.
- Led project to rebrand, modernize, and rebuild our corporate website, utilizing modern frameworks such as VueJS and Tailwind CSS.
- Maintained, refactored, and updated code as necessary to keep apps connected through APIs running and error-free, with such projects utilizing a variety of languages, frameworks, and platforms, such as Typescript, AngularJS, Heroku, and AWS.
- Worked and communicated with multi-disciplinary teams with modern project management standards (Agile/Scrum-like), with our tool of choice Asana.
- Wrote, maintained, and updated technical documentation (wiki-style) on projects of non-trivial complexity.

### Hallmark Floors

2014 - 2019

#### Role: IT Manager & Analyst

- Led project to migrate the firm's operations from QuickBooks to NetSuite in order to meet growing demands for operational efficiency and inventory tracking. Administered NetSuite thereafter on a variety of tasks including: General user administration, setting up reports and dashboards, and developing UI customizations and custom data solutions through the use of Javascript and NetSuite's API.
- Windows Server 2012 basic administration regarding active directory and network drives, worked with and managed contracts with external IT services where needed.
- Microsoft Excel reporting (Pivot Tables, VBA development for automated data querying and sorting, data visualization)
- Managed Wordpress website and supported projects on managed server hosting (cPanel).

## Primary Skills

Professional experience in web development programming languages, platforms, and skills such as:

- Javascript & Typescript
- HTML
- CSS (and several CSS preprocessors and libraries such as SCSS, Tailwind CSS, and Bulma CSS)
- Major web platforms such as AWS, Heroku, Netlify, Wordpress, etc.
- Specialized platforms such as Luminate Online, Rallybound, Hubspot, and NetSuite
- Leveraging modern web technologies such as OAuth and web APIs to create interactive applications

## Education

2010 - 2014

**University of California,  
Irvine - B.A Economics**

2017 - 2019

**Mt. San Antonio Community  
College - Computer Science**
