Experience

CauseForce

08/2019 - 12/2020

Role: Web Developer

- Built websites and developed web content to client specifications on Luminate Online and Rallybound. Developed documentation and testing methodology to ensure cross-browser compatibility and responsiveness.
- Leveraged third party and platform APIs to develop web applications with interactive and personalized content on a variety of frameworks and languages such as Angular, Node.js, Heroku
- Led project to rebrand, modernize, and rebuild our corporate website, utilizing modern front end frameworks Vue.js and Tailwind CSS.
- Worked and communicated with multi-disciplinary teams with modern project management standards (Agile/Scrum-like), with our tool of choice Asana.

Hallmark Floors

10/2014 - 08/2019

Role: IT Manager & Analyst

- Led project to migrate the firm's operations from QuickBooks to NetSuite in order to meet growing demands for operational efficiency and inventory tracking. Administrated NetSuite thereafter on a variety of tasks including: General user administration, setting up reports and dashboards, and developing UI customizations and custom apps through the use of Javascript and NetSuite's API.
- Windows Server 2012 basic administration regarding active directory and network drives, worked with and managed contracts with external IT services where needed.
- Microsoft Excel reporting (Pivot Tables, VBA development for automated data querying and sorting, data visualization)
- Managed Wordpress website and supported projects on managed server hosting (cPanel).

Career Summary

I have 6 years of experience working professionally and a little over 1 year of working in software/web development.

At Hallmark Floors, I showed my determination and tenacity by starting as inventory control clerk and earning the trust of directors by leading the project to migrate the company's operations from QuickBooks and other software systems to NetSuite, as well as self-teaching JavaScript and programming principles to better administrate, implement, and customize NetSuite.

At CauseForce I showed my value by building a data integration application on Node.js and Heroku that leveraged Strava's API to capture newly generated user data through webhooks and display them on personal pages on our own web platform on Luminate Online, creating a more personalized experience for our users. I was also the development lead on the project to redesign, rebrand and modernize our corporate website. Utilizing Vue.js and Tailwind CSS as the stack of choice to build a scalable front end.

Education

2010 - 2014

University of California, Irvine - B.A Economics

2017 - 2019

Mt. San Antonio Community College - Computer Science
